

## **Energy Management Policy**

Window Systems Division is committed to using energy in the most efficient, cost-effective and environmentally responsible manner possible.

To achieve this we will:

- Monitor and measure energy usage regularly to identify the most significant areas of use and prioritise these areas for reduction measures.
- Set normalised energy reduction targets to measure continuous improvement.
- Promote energy awareness amongst all staff and involve them in achieving the target.
- Consider life-cycle energy costs and efficiency when purchasing new equipment.
- Promote the use of suitable energy-efficient technology, equipment and best practice methods.
- Continually review energy performance through the development, implementation and communication of an energy audit.
